Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over McGuire et al.'639. McGuire discloses a method capable of ordering parts for a machine being serviced (figures 1-2c), the method comprising transmitting diagnostic data from a local computing device 16 at the machine to a host computing device 26 via a network (as seen in figure 1), identifying a part that needs to be replaced (via analyzer 16), these parts would inherently comprise both components and sub-assemblies. Further, McGuire discloses the method comprising the step of ordering the necessary parts and updating the inventory via manual entry; however to completely automate these steps would have been obvious to one having ordinary skill in the art since it has been held that broadly providing an automatic means to replace a manual activity which has accomplished the same result involves only routine skill in the art. *In re Venner*, 120 USPQ 192.

Applicant's arguments with respect to claims 11-20 have been considered but are moot in view of the new ground(s) of rejection.
